How do I ignore clipboard changes from specific programs?

If you've got a program that you'd like ClipboardFusion to ignore, such as a password manager, you can add it to the "Ignore Programs" list in the ClipboardFusion Settings.

- Make sure the program you want to ignore is running
- Open the ClipboardFusion Settings window
- Click the Ignore Programs tab
- Click the Add button
- Select the program from the list and click OK
- Click Apply

How do I perform a Silent Installation?

Starting with ClipboardFusion 3.0, we've added a bunch of useful options to the silent installer. Please click one of the links below to view the details for that installer type.

- **EXE Installation**
- **MSI Installation**

Important Note: When deploying the MSI Installer via Group Policy Software Installation, you absolutely must use the included MST (transform) file on the Modifications tab, otherwise the installation will never complete.

How do I install the Free version of ClipboardFusion?

ClipboardFusion uses the same installer for both the Free and the Pro version. If you don't enter a license key during the installation, you'll get an automatic 30-day trial of the Pro features.

After the 30-day trial is up, ClipboardFusion will automatically revert to the Free version. If you'd prefer to revert ClipboardFusion to the Free version before the end of the trial, please follow these steps:

- Open the ClipboardFusion Settings window
- Click the License Key tab
- Click the "Change to Free Version"
- Click Apply

After performing the steps above, ClipboardFusion will revert to the Free version, with the Pro features disabled. After reverting to the Free version, you'll no longer receive message box prompts to upgrade to the Pro version.

Can I transfer my license to a different computer?

A ClipboardFusion Pro license key can certainly be transferred to a different computer! The license key can be installed on a different computer if you have done **any** of the following on the old computer first:

- Cleared the license key from the ClipboardFusion Settings > License Key tab and applied the settings (reverts ClipboardFusion to the Free version)
- Completely uninstalled ClipboardFusion
- Wiped or scrap the old computer

Basically, as long as DisplayFusion is no longer in use on the old computer, you're good to use your existing key on a new computer.
